REASONS FOR ALLOWANCE

Drawings

The drawings were received on September 18, 2006. These drawings are acceptable.

Allowable Subject Matter

Claims 1-20 are allowed.

With respect to claims 1 and 13, prior art fails to teach or reasonably suggest an automotive occupant position restraint apparatus comprising a diffractive element disposed in a path of a first beam to expand the first beam into a plurality of second beams spanning across a first angle and a lens arrangement / optical arrangement disposed in a path of the second beams wherein the lens arrangement / optical arrangement expands the second beams into a plurality of third beams spanning across a second angle that is larger than the first angle, in addition to the other limitations of the claim,

With respect to claim 7, prior art fails to teach or reasonably suggest an automotive occupant position restraint apparatus comprising a beam splitting device disposed in a path of a first beam to expand the first beam into a plurality of second beams spanning across a first angle and at least one diffractive element disposed in a path of the second beams wherein the lens arrangement expands the second beams

into a plurality of third beams spanning across a second angle that is larger than the first angle, in addition to the other limitations of the claim.

Claims not specifically addressed are allowable due to their dependency.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lieberman et al. (US 2004/0108990) discloses a data input device using a diffractive element disposed in a path of a first beam that expands the first beam into a plurality of second beams, and a lens arrangement disposed in the path of a second beam that expands the second beams into a plurality of third beams.
